

July 2023

SH75 HALSWELL ROAD AND CANDYS ROAD – INTERSECTION IMPROVEMENTS COMING SOON

Yoursection.nz would like to let you know we are planning work to improve the intersection at SH75/Candys Road with a new roundabout and road widening to provide a shared path for pedestrians and cyclists from Glovers Road to Greens Drain.

The new roundabout will provide a safe intersection as we develop the land on the eastern side of Halswell Road (Riverstone Subdivision). Whites Tramway Road will be extended to the roundabout providing a new direct connection through to Kennedy's Bush Road.

What to expect

A temporary diversion road for vehicles, cyclists and pedestrians will be in place while the roundabout is being built to make construction safer for road users and contractors. A 30km/hr speed limit will be in place.

The design of the proposed work and diversion is shown over the page.

Timing

We are aiming to start work on the roundabout around the end of August 2023 and be completed around Christmas 2023.

More information

Once a contractor is appointed to the project further information will be available including a detailed traffic management plan that will provide specific information for maintaining access to residents directly affected during construction.

As the project progresses, we'll provide updates on our website at www.yoursection.nz/subdivision/riverstone/.

If you have any questions or would like to receive updates about the project please email us at enquiries@yoursection.nz.
